Importing and Exporting

[Previous](#) [Next](#)

Importing

Although you can watch your videos directly from your Flip Video camcorder, it won't be long before you run out of space. When that happens, you'll need to save the videos from your camcorder into your Flip Video library.

Exporting

Once the videos are in your library, you may want to export copies to another location on your computer in order to work with them outside of the FlipShare library. This does not move the videos, it simply makes an identical copy at the new location.
